Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Information Disclosure Statement

A PTO form 1449 is missing in the papers scanned for the present application. It is requested that applicant provide a PTO form 1449 in response to this action.

Specification

The disclosure is objected to because of the following informalities:

There are no pages after page 5 in the scanned specification of the present application. It is requested that applicant provide copies of the missing pages.

The description of Patent number 5,153,701 provided on page 3 of the specification does not match the disclosure of this Patent. Clarification is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Vogeley et al.

Vogeley et al disclose a light transmitting system comprising: an image transistor (40, 18, 24, 22, 24, 12) having a liquid crystal modulator configured to amplify light energy from a light source; and a coolant passageway (44), extending through the image transistor, configured to receive the flow of coolant.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vogeley et al.

The elements recited by claims 2-5 are well known components of a cooling system and, as such, would have been suggested to the skilled artisan by elements 49, 46, 43 and 48 of Vogeley et al.

Claims 7-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Vogeley et al does not include structure for transferring data from a low power light image to a high power light source reflected from the front of the device.

Claims 10-20 are allowed.

Claims 10-20 include the same structure as allowable claims 7-9.
